1165** **A97-12-020 - Pacific Gas & Electric Company (PG&E).**
For authority, among other things, to increase rates and charges for electric and gas service effective on January 1, 1999. I97-11-026, A94-12-005, I95-02-015 - Related matters. This decision grants PG&E's petition to modify D00-02-046 to the extent set forth in the decision, and adopts several modifications to D00-02-046 to correct and clarify the decision. In addition, the Commission finds that D00-02-046 does not reflect the Commission's intent in that decision, as modified by D01-10-031, to adopt a \$10.6 million adjustment to supervision costs in Account 903. D00-02-046, therefore, erroneously includes supervision costs that the Commission did not intend to approve. This decision orders that a correction be included in an updated results of operation calculation.

Petition to institute a quasi-legislative procedure to allow California utilities to place third-party literature into their billing statement envelopes. This decision denies the Petition filed by Crittenden pursuant to Public Utilities Code Section 1708.5. Crittenden's proposal that the Commission develop rules to allow utilities to charge third parties to include those parties' advertising inserts in utility bills does not enhance consumer information about the utilities and their services and does not address any current need of utilities or consumers. The Commission declines to commit its limited resources to develop the program that Crittenden suggests. This proceeding is closed.

R93-04-003 - California Public Utilities Commission.

Rulemaking on the Commission's own motion to govern open access to bottleneck services and establish a framework for Network Architecture Development of Dominant Carrier Networks. I93-04-002 - Related matters. This decision adopts permanent Unbundled Network Element rates for the High Frequency Portion of the Loop (HFPL) for both Pacific Bell Telephone Company (Pacific) and Verizon California Inc. (Verizon). The decision finds that establishing a separate rate for the HFPL allows Pacific and Verizon to over-recover their loop costs, since they currently recover the full cost of the loop through rates for the unbundled loop. Pacific and Verizon are required to return HFPL revenues to ratepayers through a surcredit on residential and business basic exchange customers bills.
